Reasons for Allowance

The independent claims recite retrieving content from the Internet using user defined maps and a limitation for the following:

"without modifying the Internet document at the content source, storing the user defined map such that the user can later access the Internet document from the content source using an audio interface in which the user-defined map defines the portions of the Internet document that are to be presented to the user over the audio interface by comparing the user-defined map with the Internet document"

The prior art of record teaches retrieving Internet content using telephones and user defined parameters. The prior art of record is different because it does not teach comparing the user defined map with the Internet document as recited in the limitation. New search updates revealed no other prior art which teaches the limitation in the context of the claims. Therefore, Claims 1-33 are indicated allowable.
